Subject: P-12778 Draft Patent Application for Inventor Review

Ken:

Please find attached in MS Word format our draft of the above-identified patent application (with formal drawing figures) that we have been preparing for Intel Corporation.

Could you please review our draft patent application and provide us with your comments as soon as possible. Please feel free to add, change, or delete anything in the patent application. To the extent that the other inventors have any comments or suggestions, could you please forward them to us as well so that we could incorporate them?

As you are already aware, by direction of Intel Corporation, we are filing this patent application **no later than Monday, August 27, 2001**. Accordingly, it would be greatly appreciated to receive your comments in good time before this coming Monday.

Finally, attached are the Declaration and Assignment documents (in MS Word format) for execution by all of the named inventors. When the patent application is acceptable, please sign and date both documents and return them to us as soon as possible. **Facsimile copies are acceptable**, and all of the signatures do not need to be on the same document (i.e., each inventor can sign and date a separate Declaration and Assignment document and forward them to us independently). It would be particularly desirable to receive the executed Declaration and Assignment documents from each inventor before Monday, August 27, 2001 as well, if possible.

Thank you very much for all your help, and we look forward to hearing from you soon.

E.
